Generating a New Deck

Click on the Create Deck tab and type in the questions and answers that you wish to include in your new game. Use the Tab key on your keyboard to move from field to field; use the Enter/Return key to create a new, blank card. A card can be deleted simply by clicking in one of its fields and hitting the Delete card icon. Remember to add punctuation to your questions and answers.

Adding math or Spanish symbols

To insert a symbol within a text field place the cursor where you would like the symbol added, then click on the math or Spanish palette button and choose the symbol.

A symbol can be added within a line of text, or on its own. Once the symbols palettes are opened, simply click back on either button to bring the palette to the front of your work space.

Importing clip art

To include graphics in your deck, click on the + button next to that field on the Create Deck Screen.

The “Select Image” screen lets you view All images, select only from an existing category, or add a New Category.

Choose the image that you would like to include on the card, and click on Select Image. Once an image has been placed in a field, it will replace any text, and will be identified by the file name used when originally saved. An image can be deleted by clicking on the - button next to that field.
